Professional Experience

Nationwide   08/2022 - present
Senior Software Engineer   Columbus, Ohio
- Collaborated in the development of a prominent public-facing sales web application from its initial stages to its successful launch in five states with three different primary pathways for customer's differing needs
- Led the design and implementation of custom validation across the entire app, working closely with the business team to create complex rules for more than two dozen interconnected form fields within the application
- Reduced security vulnerabilities to maintain a 90%+ secure rating on repos as a member of a volunteer DevSecOps team
- Leveraged Contentful CMS to give business partners the ability to update on-screen content in 75% of the application with no-code necessary

Branch Insurance   03/2021 - 08/2022
Associate Developer   Columbus, Ohio
- Completed a 6-month internship and promoted into a permanent position
- Developed an employee-facing account management application with payment processing while ensuring total PII safety compliance
- Practiced CI/CD within a Full Stack 100% Serverless framework, utilizing GraphQL, Apollo, Stripe, and AWS services like AppSync, Lambda, CloudFormation, and DynamoDB
- Led integral webform aspect of the application, managing the state of nested forms often three or more levels deep while also ensuring accurate implementation of customized validation

Columbus Museum of Art   09/2018 - 09/2020
Curatorial Assistant   Columbus, Ohio
- Served as the sole assistant to the entire curatorial team, contributing to all aspects of exhibition research, development, planning, and execution.
- Integral to major 150 artist, 250 work exhibition that toured nationally
- Managed all aspects of book production including rights and reproduction permissions, proofreading, editing, and color-matching
- Collaborated closely with artists, estates, institutions, licensing organizations, printers, and partner publishers
